

GDF SUEZ

**PUTTING ENERGY
INTO BUSINESS**

WORLD-LEADING ENERGY BUSINESS

Formed by the merger of Gaz de France and SUEZ in 2008, GDF SUEZ is one of the world's leading energy companies, with natural gas and electricity operations spanning the globe.

The group's activities cover the entire energy value chain, upstream and downstream, in both gas and electricity markets; from purchasing, producing and supplying energy, to consumers throughout Europe, to developing and managing major gas and electricity infrastructures across the world.

GDF SUEZ is already the number-one buyer and seller of gas in Europe, the fifth largest European electricity producer and Europe's largest gas transmission and distribution network

operator, as well as a global leader in liquefied natural gas (LNG) operations.

The group employs almost 200,000 people worldwide, with revenues of €74.3bn in 2007.* Its goal is to make energy a source of progress and sustainable development, ensuring it is available to the greatest number of people, is more reliable, better consumed and more respectful of mankind and the environment.

THE UK'S BUSINESS ENERGY SPECIALIST

GDF SUEZ ENERGY UK is well established as a specialist energy supplier to industry and commerce across the UK, as well as a growing player in the electricity generation arena.

We are constantly developing new products, adapting our services and expanding our generation portfolio to meet the needs of business customers throughout the country. Our involvement in upstream and downstream activities enables us to deliver security of supply, choice, innovation and flexibility to UK businesses.

ELECTRICITY AND GAS SUPPLY

As the third-largest energy supplier to industrial and commercial customers in the UK, we offer an innovative range of energy supply products to meet the requirements of all types of business, from small industrial and commercial companies, to energy-intensive industrial plants. From fixed price, flexible and buy-back options, to pioneering load-management services for the country's largest energy users, GDF SUEZ ENERGY UK offers products that enable all customers to achieve optimum value from their energy purchasing.

ELECTRICITY GENERATION

Since 2002, GDF SUEZ ENERGY UK has been investing in new electricity generation capacity in the UK. We own and operate a range of assets across the country, including Combined Heat and Power (CHP) facilities and Europe's largest Combined-Cycle Gas Turbine (CCGT) CHP electricity generation plant. We are continually expanding our portfolio through acquisitions and investment, strengthening our position as a major player in the UK electricity generation market.

INVESTING FOR A SUSTAINABLE FUTURE

GDF SUEZ ENERGY UK is always looking for opportunities to invest in renewable energy capacity and is actively developing onshore wind technology. As well as investing in our own windfarm, we have signed agreements to purchase the entire output from two major new windfarms in Scotland. Furthermore, we are developing a range of technologies for electricity generation from renewable fuels, such as biomass.

ENERGY EXPERTISE YOU CAN TRUST

At GDF SUEZ ENERGY UK, our knowledge and long-term experience in the UK energy markets, combined with the vast resources and expertise of our parent company, enable us to offer an unrivalled energy service to our UK business customers. Our energy specialists work in partnership with your business to understand your working practices and deliver targeted energy solutions that meet your specific needs – today and into the future.
